## PROJECTS

---

### MangaDoDs Website - (HTML & CSS, JavaScript)

🔗 <https://github.com/nadbab/MangaDoDs-Website>

Designed and developed a website for a scanlation group. (Scanlation is the fan-made scanning, translation, and editing of comics from a language into another language.)

- Displays all the comics the scanlation group has worked on.
  - Fully responsive on all devices.
  - Unique design.
  - Includes form validation.
- 

### GitHub User Finder - (HTML & CSS, JavaScript)

🔗 <https://github.com/nadbab/Find-the-Github-user>

Designed and developed a web app using the GitHub API that allows you to find the user's GitHub by searching their name.

- Displays all the user's information and the 5 latest repositories.
- 

### Track My Calories - (HTML & CSS, JavaScript)

🔗 <https://github.com/nadbab/Track-My-Calories>

Designed and developed a web app that tracks your calories for the day by simply entering the foods and the number of calories that those foods contain.

---

### Weather App - (HTML & CSS, JavaScript)

🔗 <https://github.com/nadbab/My-Weather>

Designed and developed a web app using the OpenWeatherMap API that allows you to check the weather based on your city and country.

- Option to display today's weather or the weather for the upcoming week.

## SUMMARY

---

The moment I produced "Hello World" in the console of my first application, I knew I was hooked onto the world of software development.

I've always been interested in technology as a child and had an intense passion for its dynamics, so I immersed myself into working harder with fervor to develop this passion.

In my spare time, I can be found in the gym, reading the latest tech articles or working on content creation.

## SKILLS

---

### Front End

HTML & CSS

JavaScript

Bootstrap

Materialize

JQuery

---

### Back End

Python

---

### Other

Git
